

Joe Seabrook
Junior Full-Stack Web Developer
Essex
Joeseabrook0306@gmail.com / [Github](#) / [Linkedin](#)

PERSONAL PROFILE

Junior Full-Stack Web Developer with hands-on experience building, deploying, and maintaining production websites and a beta-stage SaaS application. Strong foundation in HTML, CSS, JavaScript, Python, and Django, with practical experience across front-end development, backend logic, and APIs. Proven problem-solver with experience working on real-world projects, collaborating in teams, and translating requirements into working software. Seeking a junior developer role where I can continue to grow while contributing clean, reliable code.

TECHNICAL SKILLS

Front-end development using HTML5, CSS3, and JavaScript, with experience building responsive interfaces and handling user interactions. Backend development using Python and Django, including templates, forms, and basic REST-style APIs. Familiar with Git and GitHub for version control, collaborative workflows, and issue tracking. Experience deploying and maintaining live applications, debugging issues, and iterating based on user feedback.
